Positioning Statement: CommerceIQ AI Platform

For the VP of Commerce that needs to optimize sales, market share, and profit across ecommerce retail networks, CommerceIQ provides the CommerceIQ AI Platform to win the digital shelf, optimize retail media spend, and manage sales performances across 900+ retail partners.

Unlike point solutions or agency offerings that have limited tech experience and solutions, CommerceIQ is the only solution that provides:

- **A unified view of their business** with native applications for digital shelf, retail media, and sales performance
- **AI teammates** for retail media, category management and sales to save time and 2x performance.
- **AI Insights and Automations** to drive profit through more efficient media spend, content improvement, and lost sales recovery

CommerceIQ AI Platform Messaging for VP of Commerce

Value proposition Your core value prop is what often shows up on homepage headlines and is a clear, succinct statement of the unique value you offer customers. This should be closely tied to your positioning and have one, clear focal point. Length-wise, you're looking at around 10-15 words.	Optimize sales and market share with **AI *teammates for* digital shelf, retail media and sales** powered by a unified view of your business.
Audience A *brief* background on the profile of the persona you're targeting - note the emphasis on brief. Think about things like their personality, responsibilities, title, and role in the buying process. Remember, this is a person, not a company or group of people.	Millennial or Gen X Commerce executive with 10+ years of experience. They work for a large CPG organization with more than $300m in revenue. They are managing multiple 1P retailer networks with the goal of winning online market share and maximize sales. They are incented on share growth and net sales. Their challenges are achieving their goals in a turbulent economic environment, tracking performance to plan, diagnosing issues, and reallocating spend and resources.
Elevator pitch	**The CommerceIQ AI Platform** is pioneering a new era in eCommerce with AI teammates for digital shelf, retail media, and sales. Powered by a unified view of your

1 - 2 sentences that incorporate your value proposition. What do you bring to the table that others don't? Make sure this is unique and captures emotions and the top one to two value points you deliver. If you can try, to squeeze a word or two in about who your target market is, too.	business, our AI teammates provide real-time recommendations to improve share of voice, optimize media spend, and drive sales performance to grow market share, efficiency and profit.
Long description 100-200 words. Again, this should include the value points uncovered in your positioning work, as well as product/feature details, headline benefits, an indication of your target market and maybe even some proof points, too - i.e. names of current customers or anything brag-worthy (like awards, usage or satisfaction stats).	In today's volatile economic climate, commerce leaders face growing pressure to manage complex retail ecommerce operations using fragmented, manual, and resource-heavy tools. CommerceIQ is redefining what's possible with the industry's first AI-powered platform purpose-built for retail ecommerce. The **CommerceIQ AI Platform** provides intelligent AI teammates across the digital shelf, retail media, and sales—each powered by a unified view of your business. These AI agents continuously analyze performance and deliver real-time, actionable recommendations to improve share of search, optimize media investments, and drive incremental sales growth. Proven to cut reporting time in half and outperform traditional rules-based automation, CommerceIQ empowers brands to move faster, smarter, and more profitably. With a global retail network of over 900 partners and a customer base exceeding 2,200 leading brands, our end-to-end platform is trusted to turn data into decisions at scale.

	Whether you're looking to increase visibility, reduce inefficiencies, or drive sustained growth, CommerceIQ equips your teams with the intelligence and automation they need to thrive in a fast-changing marketplace.
Tone of voice	Brand guidelines
Outcomes What outcomes are possible because of your product/solution? Customer requirements What 1-2 things are crucial to your persona to convert? Keep this short	● It’s easy to get started. CommerceIQ is a scalable platform that allows a brand to begin with a single product, a single retailer or at a “trial” volume to prove value. ● CommerceIQ will help onboard, train and support your account with a customer

and specific.	success team.		
Outcome pillars	**Unified View of Commerce** For end to end visibility across sales, media, and shelf	**AI Insights & Reports** for faster decisions and smarter actions	**AI Recommendations & Automation** for closed-loop execution
Pain point(s)	Limited view of my business because my data is silo'd. Because of silo'd data my decisions are suboptimal. Unable to measure the impact organic search, media spend, content performance, and inventory (availability) have on my goals in one solution. There's no single source of truth for performance across functions	Decision-making is slowed by too much data to process, creating information overload and delayed analysis. Teams struggle to answer performance questions quickly and produce reports in an efficient, timely manner. Business reviews are reactive, not insight-led.	Sales, media, and category teams use disconnected tools with fragmented insights, making strategic alignment difficult and slow. Media and sales optimizations are limited by manual rules based systems. Ecommerce sales issue resolution is manual and reactive. Revenue leakage from operational issues. Digital Shelf gold standard content is out of date or incomplete impacting search and merchandising.

Product/feature benefits How well does your product resolve those pain points? Stick to 3-5 bullet points and focus these around your value and supporting benefits.	**Unified Data Catalog and Taxonomy** Collect data for retail media, digital shelf, and commerce across all retail partners for a single integrated view of business performance. **Unified Reporting Engine** Dashboards, scorecards, and custom-reporting to standardize on KPIs and provide customizable reporting views to fit your business. **Native Applications for Shelf, Media and Sales** to maximize performance across your ecommerce stack. **Amazon Copilot -** Drive profitable growth on Amazon with AI Insights, actions, and automation based on a unified	**Ally^{AI} Teammates for Sales, Media and Category** provide the following skills**:** **Real-time Insights** - Key takeaways on reports empower teams to identify trends, spot issues, and make decisions on the fly. Examples: a. Pinpoint why media efficiency decreased last week b. Identify the optimal length of product titles to impact organic search in your category c. Find out why sales is down over the last 30 days. **One-Click Report Generation** - Generate executive level reports in PowerPoint or flexible dashboard reports directly from CommerceIQ with a single click. Customizable timeframes, templates and text to tell the story you want. Examples: 1. Produce an executive presentation of last quarter's business performance for the executive team.	**Ally^{AI} Teammates for Sales, Media and Category** provide the following skills**:** **Ally^{AI} Sales Teammate** *Gap to Plan Pacing* Identify gaps in performance pacing and understand which factors (e.g organic search, product availability, media performance) have the most (negative or positive) impact. *Root Cause Analysis* Receive real-time recommendations on media spend, content performance, and inventory to close performance gaps to plan. **Ally^{AI} Media Teammate** Optimizes bid and budget performance in real-time based on CIQ's incrementality model. *CommerceIQ Incrementality Model* Proprietary model using 50+ data points such as competitor keyword activity, inventory shifts, recent sales data, and share of voice trends to adjust bid performance.

	view of your Amazon business. **Retail Media** - Make every ad dollar count with incrementality optimization across all retail networks. **Digital Shelf** - Win market share with AI digital shelf insights and automation tuned to your category.	2. Produce a report showing the incrementality gains of last week's Valentine's Day campaign. 3. Create a report for my team showing week to week business performance over the last month.	**Automated Workflows 6 ESM Automations):** 1. Unavailable SKUs 2. 3P Variants 3. Duplicate Listings 4. Content Authority 5. Variation Authority 6. PO Discrepancy **Profit Recovery Automation (PRA)**: Automates recovery for shortages, chargebacks, co-op deductions, and price variances Dashboards for tracking dispute progress and recovered revenue **Digital Shelf Content Compliance** Connect and sync Gold Standard data from PIM provider for content validation. Identify product discrepancies across retailer footprint and syndicate to PIM provider.

Proof points Back-up what you're saying with a snapshot of a real-life case study. For example, *"Within eight weeks of onboarding, John from Pretend PLC saved 10+ hours a month and increased his MRR by 11%."*	A major furniture manufacturer used the Commerce IQ platform to have a single solution for retail media management, supply chain profit recovery, digital shelf analytics, ecommerce sales ops and competitive market insights. Because of this the brand had 1. Complete visibility into the performance drivers of their business, 2. Automate campaign bids and budgets in real-time, 3. See where they stack vs. the competition in their category for SOV. In 3 months the brand generated a 4% increase in Ad conversion and a 21% increase in share of voice.	A Fortune 500 retail media team leveraged Ally Media Teammate to surface campaign underperformance within hours—not days—enabling immediate adjustments that improved iROAS by 18% quarter-over-quarter.	Within four weeks of enabling automations, a top beauty brand identified and resolved over 350 duplicate and 3P variant listings—without any manual effort. These issues had been siphoning traffic and Buy Box share for months. The brand recovered an estimated $250K in annualized lost revenue and now auto-resolves such issues in under 6 hours using CommerceIQ's ticketing engine.
