AGENDA

01 **Packaging & Pricing Approach**

02 **RMM, DSO, Amazon Copilot Packages**

03 **Pricing & Next Steps**

© CommerceIQ

SaaS Packaging & Pricing Strategy

Value Staircase Model

GOOD

- “Commodity” features
- **Box competition here**
- Match competitive pricing
- ~30% of deals

BETTER

- **Core CIQ differentiators**
- ~30% higher price
- ~40% of deals

BEST

- **Truly Innovative capabilities**
- ~30% higher price
- Resource intensive capabilities
- ~ 30%+ of deals

© CommerceIQ

Why Sell Packages

1. Easier to Sell
2. Faster to Close
3. More Money for CIQ & You!

© CommerceIQ

KEY PACKAGING PRINCIPLES

Base Tier = Commodity

- Base tier has non-differentiated features - apples to apples with competition
- Higher tiers contain key differentiated features that are valuable
- Features that are costly and not used by majority of buyers are add-ons (e.g., Marketshare)

Pricing = Scale + Value

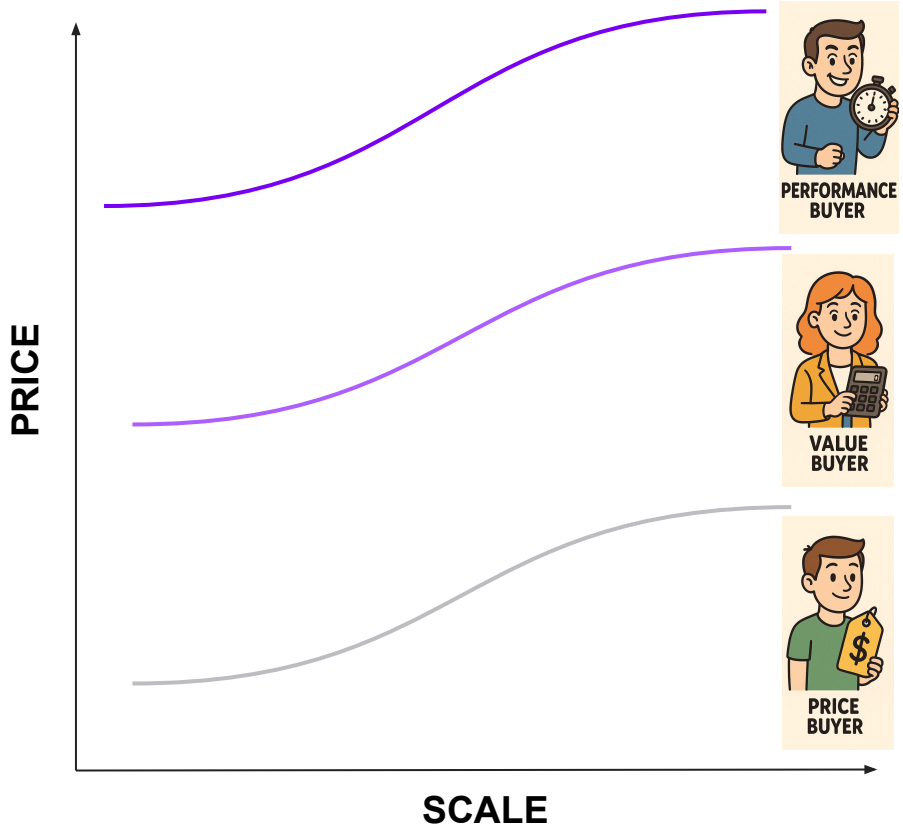
- Base package is priced aggressively to market & can be only discounted by 10% max
- Within each package, the pricing scales based on variables like # of Spend, OPS, Categories etc.
- Higher tier packages have high value features have margin and can be discounted up to 20%

Solution Selling to Right Package

- All pitches, demos/pilots will showcase the entire solution (e.g., higher tier features)
- AE to present the right package(s) after solution assessment of customer's needs
- Upon customer live and good CSAT, AE/CSD can offer a 90 day pilot of higher tier AI features that can be turned off in the product

© CommerceIQ

Identifying the Buyer Type & Package



- Buyer is focused on performance and business impact
- Price is not an issue, if the investment is justified
- Have strong internal teams that can execute

- Wants to make the safe choice. Don't skimp on price, but aren't innovators
- Solutions perceived as good value, not necessarily low cost
- Sold on value of differentiated features (ROI)

- Buyer needs are basic and can get from multiple vendors
- View vendors as swappable. Wants the best deal
- Buyer understands paying for scale. Price to market to win

AI Positioning

Old Model

AI Features

e.g
AI Incrementality
Optimization

New Model

AI Agents with Skills

e.g
Ally^{AI} Media
Teammate

© CommerceIQ

Ally^{AI} Teammates and Skills

Skills	Ally^{AI} Sales Teammate	Ally^{AI} Media Teammate	Ally^{AI} Category Teammate
Level 1	Insights 1-click Reports	Insights 1-click Reports	Insights 1-click Reports
Level 2	Gap to Plan Recommendations Root Cause Analysis	iROAS Optimization	

Product Training on May 9th / Public launch on May 21st

© CommerceIQ

Context: AI Features Become AI Agents

AI Naming

- Types: Ally^{AI} Media Teammate, Ally^{AI} Sales Teammate, Ally^{AI} Category Teammate
- Levels: Ally^{AI} Media Teammate I, Ally^{AI} Media Teammate II
- Skills examples: PPT Reports, AI iROAS GBO, Root cause analysis

AI Features

- Ally^{AI} Media Teammate I, Ally^{AI} Sales Teammate I - AI insights, PPT Reports (FKA Nexis)
- Ally^{AI} Category Teammate - New Scorecard, PPT Reports (FKA Ally on DSO)
- Ally^{AI} Media Teammate II - AI Insights, PPT Reports, AI iROAS Optimization
- Ally^{AI} Sales Teammate II - AI Insights, PPT Reports, Gap to Plan, Root Cause Analysis (FKA Command Center)

GTM Key Dates

- May 9 - Positioning Ally^{AI} Teammates training
- May 21 - Public launch (website, PR)

PRICING

© CommerceIQ

PRICING STRATEGY W/ PACKAGES

ASSESS SOLUTION NEEDS

- Complete the solution assessment before Packaging and Pricing is provided.
- Demo all key differentiated features to prospects to show the power of Performance package
- Understand the buyer type - Price buyer, Value buyer or Performance Buyer

IDENTIFY RIGHT PACKAGE(S)

- Determine the “must have” features for the customer
- Determine the package(s) that would be appropriate for the champion
- Select the add ons that are available for a given package. No add-ons available on CORE.

NEGOTIATE DOWN TIER IF NEEDED

- Use lower tier packages if price becomes a challenge or is compared vs. competition’s price
- Be clear on the key capabilities customer will lose with lower tier package
- CORE price can only be discounted a max of 10%, while we have more flexibility with higher tiers

© CommerceIQ

PRICING STRATEGY FOR EXPANSIONS

- Case by Case basis
- At the time of renewal or expansion
- Factor in existing ARR and transition them to the right package
- The goal is price increase of < 5% if customer is not interested in new capabilities

© CommerceIQ

RMM PRICING STRATEGY - CAPTURE MARKET SHARE

PERFORMANCE

- Anchor Features: Media Teammate II (AI iROAS), Data Sharing, 2500+ KW

PLUS

- Anchor Features: AI Teammate I (PPT reports), iROAS rules automation, 500 KWs

CORE

- Anchor Features: Rules based automation (ROAS), Campaign mgmt, Standard AMC reports :
